

Analyst support for cross-cutting themes for food security and resilience

Project Title	Analyst support for cross-cutting themes for food security and resilience
Project Summary	Uncover insightful, forward-thinking knowledge through analyses of various sources of data on themes common to food security, resilience, nutrition, and water security. Themes include gender, youth, digital innovation, capacity development, and water safeguards.
Country	United States

Project Description

The USAID Bureau for Food Security strives to sustainably reduce global hunger, malnutrition, and poverty. Gain a breadth of experience in international food security, and Feed the Future programming by applying your skills and knowledge to analyze existing information on cross-cutting themes to inform key decisions and reports on progress for a range of audiences. The inquisitive, perceptive, and proactive candidate will enhance the utility of data and information for decision-making through literature reviews, data analyses, data visualizations, and other deliverables to help tell the story of the relationships between and among cross-cutting themes and outcomes in food security, resilience, nutrition, and water security. Illustrative examples of assignments include analysis of country-Level programming; research for case studies to illustrate successful and flawed efforts in cross-cutting programming; literature reviews; and related reports, fact sheets, and presentations.

Required Skills or Interests

Skill(s)

Analytical writing

Data analysis

Data visualization

Design thinking

Economic analysis

GIS expertise

Graphic design

Infographic design

Political Analysis

Research

Storytelling/blogging/vlogging

Survey / polling design

Additional Information

You will work with a growing team of technical experts charged with integrating cross-cutting themes across the Bureau. In addition to the above-listed skills, we would include expertise in Excel; technical writing; data visualization (e.g., familiarity or experience with Stephanie Evergreen's work); and/or storyboarding, graphic recording, or sketchnoting. We're looking for someone who has experience delivering quality products while working remotely, is self-motivated, and takes initiative to seek clarification and guidance on tasks as needed.
